

International Marine Mammal Law: A Comprehensive Guide to the Legal Framework for the Conservation and Management of Marine Mammals

By Jennifer Kasius

Marine mammals are a diverse group of animals that include whales, dolphins, porpoises, seals, and sea lions. These animals play an important role in the marine ecosystem, and they are also a valuable resource for humans. However, marine mammals are facing a number of threats, including habitat loss, pollution, and overfishing. As a result, there is a need for a strong legal framework to protect these animals.
