## **Understanding Intensified Math Interventions**

Intensified math interventions are designed to provide students with additional support and instruction beyond what is typically offered in the general education classroom. These interventions are typically individualized, meaning they are tailored to meet the specific needs of each student. They also involve a higher level of intensity, including more frequent and longer intervention sessions.

Intensified math interventions are typically implemented when Tier 1 and Tier 2 interventions have not been sufficient to improve a student's math achievement. Tier 1 interventions are the core math instruction that all students receive in the general education classroom. Tier 2 interventions are supplemental instruction provided to students who need additional support beyond Tier 1 instruction.

## **Research-Based Strategies for Intensifying Math Interventions**

The Guilford Series on Intervention and Prevention is based on the latest research on effective educational practices. Intensifying Mathematics Interventions for Struggling Students draws on this research to provide educators with a variety of research-based strategies for intensifying math interventions.

Some of the strategies discussed in the book include:
